BlueStar

Rechargeable Bluetooth laser mouse

The newest mouse from DICOTA presents itself on the newest technical level – BlueStar unifies both Bluetooth transmission and laser technology. Thanks to data transfer via Bluetooth the mouse manages without a cable and at the same time only uses a very small amount of power. The laser sensor's especially high resolution of up to 1600 dpi offers quick and precise operating on nearly any surface. The result is a Notebook mouse that enables ultimate mobility of up to 10 m working range and which is easy to use.
An elaborate installation is not necessary thanks to Plug & Play. The Bluetooth module and the Notebook's Bluetooth-compatible software make for simply connectivity of the mouse. BlueStar's scope of supply includes two rechargeables, which can easily be recharged via the USB cable. BlueStar has three buttons including a scroll function. The blue rubber coating not only makes for an optical highlight but also ensures pleasant handling. This innovative mouse meets the high demands of mobile users and is persuading in every detail.
